

THE GLEICHEN CALL

VOLUME XXXVIII

NO. 10

GLEICHEN, ALBERTA, WEDNESDAY

MAY 23, 1945

SUBSCRIPTION \$2.00 PER YEAR

VICTORY LOAN REACHED A TOTAL OF \$107,000

We're close of \$107,000 Eighth Victory Loan drive saw \$107,000 subscribed by the people of the town and district. This is just \$100 less than the amount subscribed for the seventh loan last fall.

Below is how much the different areas subscribed:

Town	\$40,350
Country	\$7,350
Church	20,450
Employees Indian Reserve	8,850

Total \$107,000

FROM THE FILES OF THE CALL

TWENTY YEARS AGO

James Young, wife and family have moved into town from the farm north of town and now occupy the Biestek residence.

Don Brier returned to Gleichen from Calgary where he broke his leg some weeks ago.

Shows in organics a baseball team to challenge Gleichen players.

Some mysterious person disturbed the Women's Institute regular meeting the other night by suddenly opening the door and throwing in a large quantity of dried beans and dried onions, while visitors of all sorts of beans were whispered of. At last an attack was made on the bundle on beans, when it was discovered it contained some most delicious chocolates. The visitors were now looking for the villain with a view of taking him to repeat the scare.

Baseball is now to a splendid start again and with a well attended meeting last Friday evening the following officers were duly elected: Hon. Pres. Howard Bowen; Pres. R. M. Stabback; Secretary Dr. Wright; Manager, J. O. Bogatic. Manager Bogatic reports some new material in town and with him at the head of the ball club watch our chug.

Members of the golf committee are busy repairing the golf course and when the golfers of Gleichen will have an up-to-date course. Mr. Reid of the Royal Bank is secretary.

Last week Indian Agent George Gooderham and his staff paid off at Blackfoot. Indians to about \$10,000 in hard cash leave Gleichen.

We are now advised that 22 years ago, May 18, 19 and 20, Gleichen experienced the worst storm known in history. His photos showed the snow higher than the stock yard fence.

Mr. and Mrs. Hunter and bride returned to Gleichen last Saturday after spending a honeymoon of over four months in the east. The popular young couple were given a welcome home. Monday night they had their first night in the home of Mr. and Mrs. John Bracken.

This year's committee consists of: Hon. Pres. Healy; Vice-President, Arthur Crowshaw; General Manager, Ted Yellowell; Arena Director, Joe Crowfoot; Chairman, Joe Bear Robe; Secretary, J. Spotted Eagle; Treasurer, A. Pretty Young Man.

Posters giving full details of the big show will be out in a few days.

For sister communities. This is the correct view. It is the right attitude, the Canadian way of building Canada. It is an important problem and has far-reaching effects on the business and the building of towns.

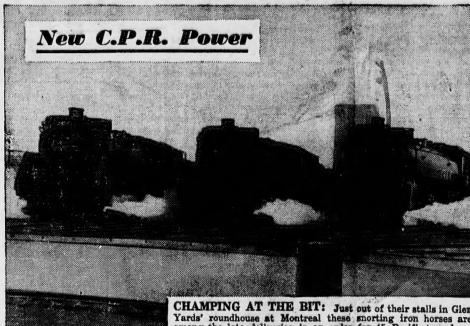

There are many factors that determine the enlargement of a trading or business area. One factor, considered by local business houses, offered inducements to the surrounding populations which automatically and inevitably creates a centre of trade and business for the district. But business alone does not do it. There are striking examples in which institutions such as churches, schools are the drawing power.

At the last session of the provincial legislature it was announced that the School of Agriculture at Vermillion will be re-opened for courses in Agriculture and Home Economics. and steps are being taken to reconstruct the buildings for the next regular school term which commences the middle of October. The school was closed in 1941 as a wartime measure, the buildings being taken over by the Department of National Defence as a training centre for the C.W.A.C. The training station was closed last year when the plant again available for its original purpose. For the past four years the School of Agriculture at Olds has been over-subscribed and last fall many applicants were not able to gain admittance. This, along with improvement in conditions generally, has prompted the re-opening of the school.

Much rain has fallen at different times during the past week. Thursday fell most of the day. Sunday rain was heavy. Reporters say that there was much more rain in the surrounding country than fell in town. Seeding, which is far behind schedule, was stopped for a few days.

Fif. Lieut. James Plant, one of the three men from Gleichen who was a prisoner of war in Britain, is now reported to be safe in British. Fif. Plant was on the staff of Old School for the C.W.A.C. at Olds well known in town. He enlisted with the R.A.F. in 1937 and was in the same plane with Fif. Lieut. G. Walker.

New C.P.R. Power

CHAMPING AT THE RIT: Just out of their stalls at Montreal these morning from horses are among the late deliveries in an order for 45 Pacific-type locomotives completed for the Canadian Pacific Railway in April by Canadian Locomotive Co. The order, worth \$1,000,000, was placed out for them in maintaining the C.P.R.'s impressive war hauling record which stood at 253 million tons of freight and 68 million passengers at the end of 1944.

Blackfoot Rodeo on June 6th

The Blackfoot Indians announce that they intend to hold their second annual rodeo on Wednesday, June 6th at their stampede grounds on the reserve on the North Camp flats, one mile south and two miles west of town.

The program will consist of bucking horse riding, saddle, bare back riding, calf roping, steer riding, wild cow milking and interspersed in these events will be half mile and one mile races, relay races, cart races and stake races. The program will start at 1:30 p.m. sharp and to carry out all the events it will take all afternoon. The day will be wound up with a dance at night in the Gleichen Community Hall.

Last year the Indians put on their first rodeo and it really was a good one. It was a credit to their ability to put the affair over as well as they did. Practically no time was lost in getting the various events underway. No doubt with the experience they had they will be able to put the show over a little better this time.

The setting for their rodeos is a good one on the flat west and below Old Sun School. There the Indians have built corrals and surrounded the arena with a high wire fence. There was a very large attendance last year, so many in fact that the entire arena was surrounded by cars which came from all over the country.

This year's committee consists of: Hon. Pres. Healy; Shield; President, Tom Healy; Vice-President, Arthur Crowshaw; General Manager, Ted Yellowell; Arena Director, Joe Crowfoot; Chairman, Joe Bear Robe; Secretary, J. Spotted Eagle; Treasurer, A. Pretty Young Man.

Posters giving full details of the big show will be out in a few days.

John Bracken — The Farmer

On the 11th of December, 1942, John Bracken stood in the Auditorium in Winnipeg before a great concourse of people. John Bracken — the Farmer — was accepting the leadership of a great resurgent people's party. In ringing tones he was speaking of "The People's Charter". And the soul-searching sincerity of this man of the soil, with his vision of Canada, of Canadians and the "world of plenty that lies within our grasp" was deeply moving.

Picture the background of this man — this moment. John Bracken, the farm boy, on his father's farm in Ontario, milking, haying, carrying in the wood, plowing ... then young Bracken, honours student at the Ontario Agricultural College, and then, as representative of the Department of Agriculture, sent on to Saskatchewan as Superintendent of Fairs and Farmers' Institutes and Secretary of the Provincial Livestock Association. Then, later, John Bracken author, writing books about farm farming, farmers ... And now years later, in Winnipeg, John Bracken, the farmer, is speaking of "the right of farmers and other primary producers to a fair share of the nation's income." Notice the simplicity of the language he uses, clear, simple, direct.

"During the last decade," he is saying, "farm income fell to such a low average as to become of very great concern in our Canadian economy. It is the responsibility of the nation to see that this great inequality shall not be perpetuated."

Then, suddenly his voice rises, becomes even clearer, more intense. "I would say quite frankly that if it had not been for that plank in your platform which provides for a square deal for agriculture, I would not be here."

Two years later, in Alliston, Ontario, — again the same simplicity, the moving sincerity.

"I am an agrarian," said John Bracken, "and I am a Canadian who sees to correct the major social injustice of our day, the gross inequality of the national income that goes to farmers and farm workers and farm workers." Then, with a statesman's enlargement of vision, he added, "When the injustice to the farmers is corrected, the economy of Canada as a whole will be strengthened."

No one could be less parochial in his outlook — more deeply concerned with national welfare than John Bracken, the farmer who embarked twenty years ago on a career so successful he was without precedent in controversial history within the British Commonwealth of Nations.

All restrictions on the import and manufacture of repair parts for farm machinery and equipment are to be lifted on July 1.

Canadians Indians have decided that the acceptance of family allowances will not prejudice their constitutional rights.

A cut in the individual sugar ration from 14 to nine pounds from June 1 to December 31 has been announced by the Canadian Prices Board.

From the 17 ships ready for active service at the outbreak of war, the Canadian naval service has grown to a force of 930 ships, 373 of which are warships.

Consumption of fresh fruits and vegetables increased sharply in Canada during the war years. Canadians

consumed a total of 109 pounds of tomatoes and citrus fruits per capita in 1944 compared with 88 pounds in 1939.

There is a great demand from the Red Cross for socks, both for men in the service and boys and girls, since 2 to 12 years. Also badly needed are infants vests. These demands come from liberated countries.

The National War Board of Canada plans to train three hundred men a day, training films for the services, new items and shorts subject for the theatres, and films directed to specialized audiences in

REHABILITATION

... of ex-service men and women can be achieved only by A UNITED CANADA

The problem of reconstruction will be solved neither by waiting and hoping for the best, nor by blind-eyed fanatics that tears down the whole economy that is the life blood of livelihoods, before it has any thing to put in its place.

John Bracken and a Progressive Conservative Government will implement a policy that will give every ex-service man and woman a square deal, and every Canadian the opportunity to earn a comfortable livelihood.

Winston Churchill

AS THE WAR IN EUROPE becomes a part of the past, certain patriotic events stand out clearly when we recall that long and desperate struggle. To the people of the Allied nations, and particularly to those of the British Empire, the figure of Winston Churchill will remain a symbol of the courage and determination which brought us to victory. Long before it was generally realized that Nazi Germany was preparing to destroy Europe, the world's best Churchill was warning us of the need to have him, and had failed. The British public of this approaching danger. His warnings were not at that time, but in May, 1940, when Germany had conquered almost all of Europe, and an invasion of Britain appeared imminent, he was called upon to lead the government.

When he took office, Mr. Churchill did not fully realize the serious situation caused by the fall of France and the evacuation of the British Army from Dunkirk to safety, but he knew that Britain's policy should be "to wage war by sea, land and air with all our might and with all the strength that God can give us." This was the first of many stirring messages which inspired the people of the Empire and of all the freedom-loving nations, to have hope and faith that God would, some day, be defeated. Many passages from his speeches are now well known, and these are so good, that they should be considered to be immortal, and these is no doubt, but that these speeches will live on in English history and literature.

Mr. Churchill inspired the people of Britain and of the Empire with courage and hope during what may have been the darkest hour in our history. In international affairs, his leadership has been equally wise and courageous. While Russia was the only ally to stand by to establish closer and more friendly relations between that country and his own, he likewise did much to strengthen Anglo-American relations, which are so important both in war and in peace. By his personal friendship with the leaders of Russia and the United States he helped greatly to foster the spirit of partnership which was necessary to bring the enemy to the point of unconditional surrender. Without doubt Mr. Churchill will be as well known to future generations as he is today, for his great and gallant leadership during one of the darkest periods of history.

Kept In Caves

A Simple Solution

Britain's Art Treasures Will Soon Be On Their Way

Britain has begun to "unearth" her art treasures from their secret wartime hiding places. Soon they will be displayed again—their splendor undimmed. In their old homes throughout the country, says the London Daily Mail, Sir Kenneth Clark, Director of the National Gallery and Surveyor of the King's Pictures, has decided to set these caves in a Welsh slate quarry. In caves as big as parish churches and 300 feet below ground, Rembrandt's "Jewish Rabbi", Velazquez's "Venus and Cupid", and Rodin's "Vulcan", Titian's "Bacchus and Ariadne", Toronto's "Origin of the Milky Way" have remained undisturbed for more than five years. So, too, have Turner's famous water colors and examples of all the modern foreign schools, including Van Gogh, Gauguin, and Manet—with hundreds of other priceless works.

A GENEROUS GIFT

Sir James Dunn, president of the Algoma Steel Corporation, Sault Ste. Marie, Ontario, has recently promised his Cedarhurst as a convalescent home for returned soldiers. Cedarhurst is a beautiful property on the brow of the hill overlooking the expanse of the St. Mary's river.

Children in U.S. Town Found Easy Way to Save

Children have the gift of solving things directly, easily and sometimes brilliantly! They do not refer questions back to dubious standards and their ignorant predecessors. Something happened recently in Cranberry Pennsylvania, which perfectly illustrates this peculiar gift—we heard of it through a friend. In Germany there are two schools, one for boys and one for girls, and they are entirely white. The game of little boys from the two schools often play together. One day they invented a new game called Race Riot, but when they got into it, they found out that there were more white boys than colored boys. Clearly this was out of balance and unfair. What do they do? Like a flash the boys thought of a plan. A proper number of white boys spontaneously volunteered to play colored, and the race riot proceeded with even numbers, in perfect equality. Adults, we feel, would have had the devil's own time with a situation like that.

Cleaning Blighted Areas

German Prisoners Of War Have

German prisoners of war in Britain have started to clear blighted areas in preparation for housing sites. In a few months it is expected more than 500,000 prisoners will be employed in this work.

Unions have agreed on rates of pay and hours of work and the ministry of war has said that not one British worker will be out of a job because of the plan.

Since the fall of 1939, more than 30,000 Canadians have been the victims of tuberculosis and at least 50,000 were affected by the disease.

Price Control And Rationing Information

Q.—Am I allowed to increase the rent on my house? I have spent quite a sum of money on it on improvements.

A.—Expenditure for improvements may not be less than 10 per cent. of the assessed value of the accommodation, then a landlord is entitled to increase the rent. You are not permitted, however, to raise the rent more than 10 per cent. first received from the Rentable Department of the War-time Prices and Trade Board.

Q.—Every time I buy meat, I seem to pay a different price for exactly the same thing. Would you give me a list of ceiling prices for the various cuts?

A.—Every butcher is forced to display price lists in a prominent place. All the meat must be checked by the customer before purchasing. If a sharp increase in price is noted, the War-time Prices and Trade Board will be informed.

Q.—Will our graduating class be permitted to wear gowns?

A.—At the present time the long gowns displayed in stores are to be used only for the fitting of religious orders. If the Board permitted the manufacture of long gowns, it would be necessary to add one-and-one-quarter yards added to each dress, and the extra yards for the stiffening. The suitable situation is increasing seriously.

Q.—Are visitors from the United States entitled to ration coupons?

A.—The Canadian government can obtain their application to a local government office, and the extra coupons will be issued. The War-time Prices and Trade Board once in your province.

Q.—Please send your questions or your request for the "parental" column to the War-time Prices and Trade Board, 100 Bay Street, Toronto.

Q.—What two hats to match that dress?

Q.—Wife, oh, no, I haven't. I've only one dress to match the two hats.

Q.—You told that it was five minutes' walk to the station, and it's a good twenty minutes."

Q.—"Yes, but he was alone and he seemed to freeze."

Q.—He (nervously)—Elizabeth, darling, there is something that has been troubling me.

Q.—She is qualified to help him.

Q.—She is qualified as a psychiatrist

stenographer and it was this special

qualification that drew her to him.

Once Carried Tourists

Canadian S.S. "Prince Edward" Now Serves in The Royal Navy

The "Prince Edward," which has been turned over to the Royal Navy for service against the Japanese, was once the flagship of the Canadian National Steel Fleet carrying the thousands of tourists along the scenic Coast to Alaska. Built in Birkenhead, England, she was launched in 1930, christened by Miss Isabel MacDonald, daughter of Ramsay MacDonald, former Prime Minister of Great Britain.

Built at the same time were her two sister ships, the "Prince David" and the "Prince Robert." They were built as the "embodiment of everything that is latest in ship construction," with luxurious accommodations for 374 first-class passengers. All three went to war and played a prominent part in the invasion of Europe.

A survey by the Air Transport Association at Washington revealed that women hold one-third of all jobs in United States civil aviation and that 20 percent of the line passengers are women. Of the number women are 8,000 stewardesses, but women are in almost every phase of the industry except actual flying of planes and their number is constantly increasing.

OUR COMPLETE SHORT STORY—

REMEMBER THE DATE

By MARCIA DAUGTHREY
McClure Newspaper Syndicate

Ned Norton felt fine. He was getting home early for a change—it was only after five o'clock in the evening. The late afternoon was always a slow, quiet spring. Business was humming, and he was in love with his wife—a neat number named Blaire.

In addition to all that, he had sort of a minor romance. Not exactly a romance, either, because there was nothing serious on either his or the distaff side. Still, there was something slightly pleasant about getting into the elevator at the office without knowing whether Miss Hathaway was the person who had rung the doorbell on the fifth floor. Sometimes it was, and sometimes it wasn't.

But when it was she who stepped on the elevator, Ned unconsciously squared his shoulders while an inner tossin began to ring. Nothing to it, really, tried to tell himself—ignore the woman.

Certainly, he had superb suburban hair; of course he liked to have the boys at the office chuckle afterward. "You're a real gentleman," he'd say, and she'd smile. How about giving a bachelor a break and taking me along some day?"

He could almost hear his ego purr: "Just an old friend of the family," he'd say, grinning. "You know, in his heart, he'd mind marked 'obligation' he would tuck a haunting memory of the way he had felt when a tendon of her perfume had floated past his nostrils; also the way she sometimes tucked up at him now.

It was all quite innocent, really.

So Ned Norton felt fine as he stepped into the office, ordering the service porch, not because his shoes were soiled but because this was another of the small-baby habits he had brought along from his boyhood. Perhaps Miss Hathaway was right; it was his life's only rebellion against maternal and wifely authority. A rather fragile rebellion at that, he was.

"Hi, beautiful!" he called when the closed kitchen door brought no trouble shout of greeting. He waited for her sang out: "Come out, come out, wherever you are."

Still, another, that was odd. Blaire never planned to be away in the afternoon without telling him in minute detail where she was going and how long she would be gone.

With a grinning into the living room, she found him on top of the lounge, and a vase toppling on the chair in the vase was the last.

"Blairie, another, that was odd. Blaire never planned to be away in the afternoon without telling him in minute detail where she was going and how long she would be gone.

With a grinning into the living room, she found him on top of the lounge, and a vase toppling on the chair in the vase was the last.

Ned was laughing silently as he unfolded the note and glanced at the ornate backhand: "Darling: I love you with all my heart, but sometimes I wonder if you (feel) the same way. I'm giving away a little while to find out, Blaire."

Ned turned the note over and studied the blank opposite side as if he had come across an anagram whose answer was not found in the Webster. He then returned to the script and read it again. Yes, it was exactly the same as it had been on first perusal.

Was this fantastic. It was unbelievable, Blaire—leaving him. What for?

They had had their arguments of course—who didn't? The overdrawn household account was the last straw, for instance. He had been more than a little caustic about it, he remembered. "Either you live within the budget, or I'll handle all the finances," he'd threaten.

They were rented for a day, then had fun saving back the overdrawn by feeding him fantastically cheap meals for a week. Good, though.

Warm-hearted and sentimental; practical and full of laughter—that was Blaire.

Abruptly, Ned sat down in the nearest chair as perspiration broke out on his forehead. Somehow he had seen the same blushing pathway to heartbreak four times last week. And Blaire had been dog enough to tell Blaire. And Blaire, hot-headed that she was, had walked out on him without even saying good-bye.

Now that he thought of it, the thing would have been difficult to explain. How could a man say, "I am already in my blood." Is a victim of spring. No, that wouldn't do. Lydia E. Pinkham's Compound, he began cursing himself as a fool.

Well, he'd have to do something.

Dialing savagely, he called the station. Then he called the airport to find the chance that Blaire had taken it big.

He hung up in the middle of a series of frantic questions when he heard a suppressed chortle behind Blaire. "Did I scare you?" giggled Blaire.

With one powerful gesture Ned gathered her into his arms and kissed her as he hadn't since honeymoon. "What's this all about, the world?" he murmured as he kissed her.

"April Fool! April Fool! Oh, Ned, you could have seen your face! You looked as guilty as Jack the Ripper!"

For an instant, Ned was angry with his damp forehead for his chilly hands. He had an urge to take her over his knee and give her a harsh spanking. Yet—if it hadn't been for his preoccupation with Miss Hathaway, he would have seen through Blaire's April First stunt instantly. Blaire was simply one of the world's top lights.

"The next time you pull a stunt like that," he said severely, "I'm going to tan your trousers. But tonight I'll take you to dinner—and that's no April fool joke."

Will Take Years

Reconstruction Work In Liberated Europe Is Tremendous Task

It is estimated that it will take two years to rebuild the Ludendorff bridge at Remagen, over which the Allied forces in the west made their first crossing of the Rhine. The bridge, which had spanned the river since 1914, was destroyed as a result of enemy action.

The estimate of two years to rebuild this one bridge gives some idea of the tremendous task of reconstruction which awaits the Allies in Europe. The task is a vast deal of work to be done. This is perhaps especially true in war-torn Poland, Russia, Belgium and Holland.

SELECTED RECIPES

SPRING TOE FOR WINTER MEAT

Ham spring fever hit your household? If so, appetites are apt to drop, and the result is a general change. A change of scenery in your menu!

So far, the family is accustomed to finding their breakfast cereal in a bowl. Surprise them some morning soon with a dish that all will relish. These same crisp all-wheat flakes will also give a new flavor to many grain dishes for baby fare. They can be stirred up in a jiffy and baked in the oven.

WINTER Muffins

2 tablespoons shortening

2 tablespoons sugar

1 egg

1 cup all-wheat flakes

1/2 cup sifted flour

1/2 teaspoon salt

1/2 teaspoon baking powder

Blend shortening and sugar thoroughly; add egg and beat well. Stir in sifted flour, salt and baking powder; mix well until a smooth dough appears. Fill greased muffin pan two-thirds full. Bake in a 350° oven for over 20 minutes. Yield: Eight 2 1/2-inch muffins.

WORLD SECURITY CONFERENCE MAKING PROGRESS

(By D. Russell Ferguson, special correspondent Canadian Weekly Newspaper Association.)

With the completion of the preliminary work of the conference, the real work of the conference has begun and commissions and committees are working on the many amendments to the draft which came out of the Dunsmuir Oaks meeting of the leaders of the Allied powers. These amendments have been considered by the governments of the Allied Nations, and delegates to this conference have been charged with putting forward their views and seeking to have amendments made in the final charter for world security which will emerge from this meeting.

During the plenary sessions, to which the public was admitted, the discussions were presented, and at times during the past week it looked as though an impasse had

been reached. On several occasions the conference was deadlocked on vital points—particularly the decision of the delegates to admit Argentina and exclude Poland. The issue indicated the lining up of a strong Latin-American vote.

Experienced observers have been watching for such a development as the 20 Latin American states produced, but they seem to have left the master to rest here. There is nothing evident to suggest bloc tactics as a means of furthering the interests of a group. The spirit of the conference may be described as highly co-operative.

Friday night was the last hour for receipt of amendments to the plan put forward from Dunsmuir Oaks and a large number of amendments were presented. The main point in the main with its veto power of the greatest powers, many of the small and feeling that some modification should be made in this direction. The general powers regular. Also had been presented under special and different proposals for membership of the security council to be confined to those

powers which by past actions have shown that they are willing to fulfil the obligations demanded by the security council. In this group are the United Kingdom and members of the British Commonwealth, which in two wars have demonstrated their will to support the cause. Australia has been spoken on the qualifications required for this role.

Canada has been responsible for a number of amendments to the basic draft, but they may be regarded as clarifying the existing agenda rather than advancing the cause. One suggestion is of the opinion that so many amendments have been offered by supporting those which meet our case we will contribute more than by adding to the long list. This is a reasonable approach to the problem and is likely to gain more than we would by suggesting amendments.

When the conference has finished its work they will have modified the Dunsmuir Oaks plan into a charter acceptable to all. It is felt that this will bring this compromised world organization back to their governments for ratification. Then the San Fran-

cisco World Security Charter has been approved and a new world organization will begin to function. Between then and the present time is a tremendous amount of work to be done in producing a draft acceptable to all and only the urgency of the situation and need of the Allies for war purposes suggest that all other issues will be secondary to the work in hand.

More than any time the work of the present conference is of vital importance to the world. The need for this charter has become imperative with the cessation of hostilities in Europe. While this meeting is in no wise the peace conference it is in some respects more important, as it is the first step in the preparation to take care of the post-war world. The appeal Athene Eden for a speedy conclusion of this conference has been reiterated by other speakers, who are anxious for a blue print for the future to be ready when required. That time seems very near at hand now.

Another important item of great gravity in the present war is the great use of the method of Canadian-developed drug named heparin, which prevents coagulation of the blood.

A group of 72 Canadian civilians most of them missionaries have returned to Canada from the Philippines where they were liberated from Japanese camps by United States forces.

The Canadian Pacific Steamship Company has announced that the loss of 12 ships in enemy action during the war. These include the Empress of Britain, the Empress of Asia and the Empress of Canada taken over by the government for war purposes.

TENDERS FOR COAL (Western Provinces)

SEALANT, the tenderer, is invited to the undersigned and endorsed "Tender for Coal for Western Provinces" will be received until 3:00 P.M. (E.D.S.T.), Wednesday, June 15, 1945 for the supply of coal for the Dominion Buildings and Experimental Farm and Stations throughout the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia.

Forms of tender with specifications and conditions attached can be obtained from the Purchasing Agent, Department of Public Works, Ottawa, or the District Resident Architect, Winnipeg, Man.; the District resident Architect, Saskatoon, Sask.; the District Resident Architect, Calgary, Alta.; or the District Resident Architect, Victoria, B. C.

Tenders should be made on the forms supplied by the Department and in accordance with the departmental specifications and conditions attached thereto. Coal dealers' license numbers must be given when tendering.

The Department reserves the right to demand from any successful tenderer, before awarding the order

By order,
J. M. SOMERVILLE,
Secretary,
Ottawa, May 17, 1945.

Real Social Security or Rationed Scarcity?

To the political and economic reactionary, Social Security is something to be used as a bribe to win votes—a sop to soothe unrest. Social makeshifts of that kind are actually offered to-day as political substitutes for sound, economic planning for the post-war reconstruction of Canada.

To the State Socialist, on the other hand, Social Security is a bookish theory seeking to prove that poverty would be much more endurable if only it were much more general.

And now, listen for a moment to John Bracken, the forthright leader of the Progressive Conservative Party:—"The State here in Canada, unlike in Germany, is the servant of the people, not its master. Finance, and economic mechanisms associated with it, must likewise be regarded as the servants, not the masters, of our economy. The underwriting of prosperity AND social security is a proper function of the State."

Notice how closely prosperity and social security are linked together.

We are determined that Social Security shall no longer be regarded as a charity but as what it is—social obligation and national responsibility of the very first magnitude and importance. Social Security must grow with prosperity—because the degree to which social services may be provided is determined by the size of the national income. We are pledged to maintain that income at a high prosperous level. It is against this background of plenty for all, that the Progressive Conservatives see Social Security.

The Progressive Conservative Party is pledged to provide, without delay, a uniform and comprehensive social security programme for all Canadians, including:

- ✓ Extended unemployment insurance coverage.
- ✓ Adequate payments for the maintenance of unemployed.
- ✓ Accident and sickness benefits.
- ✓ Children's allowances.
- ✓ Maternity benefits.
- ✓ Widows' benefits.
- ✓ Retirement pensions.
- ✓ Increased old age pensions at age 65.
- ✓ Increased pensions for the blind.

Where any of these social services are administered provincially, we shall provide grants large enough to ensure adequate standards of social security for all Canadians.

Compare this positive and complete programme with the make-shift expedients of other parties. No other party can equal or even approach John Bracken's guarantee of security for all Canadians.

It's rational security—NOT rationed scarcity.

Notice of Preparation of Assessment Roll

TOWN OF GLEICHEN ASSESSMENT ROLL 1945

Notice is hereby given that the assessment roll of the Town of Gleichen for the year 1945 has been prepared and is now open for inspection at the office of the secretary-treasurer of the Town from ten o'clock in the forenoon to three o'clock in the afternoon on every day, which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until noon and that any person who objects to the entry of his name or that of any person upon the said roll, or to the assessment of any property, must within thirty days after the date of this notice lodge a complaint in writing with the secretary-treasurer.

Dated this 21st day of May, 1945.

Ordinary one Canadian in every six gainfully employed

earns his livelihood in a "small business." It may be a farm, a store or a lumber-yard; an architect's office or a service station. Taken together, these individual enterprises provide a very substantial part of Canada's total jobs—must continue to do so after the war.

During the years ahead many people who dropped small business for war reasons will want to return to their accustomed or new ways of making a living. Thus old businesses will be revived. Many new ones will be started by returned men and people now in war industries. The commercial banks will do their part to afford assurance that no sound credit requirement need be left unmet in the field of small business.

As such businesses grow, they create additional job openings; that has been the pattern of Canadian enterprises. Most large companies began in a small way. And practically all could name some bank which played a part in their growth by providing the loans they needed to finance their day-to-day operations.

Your bank stands ready to serve businesses, small or large, well established or just starting out. Banks do not initiate such businesses—but they do furnish necessary working capital and many other forms of banking services.

OUR COMPLETE
SHORT STORY—

For Women
There's Waiting
By MARCIA DAUGTREY

McClure Newspaper Syndicate

The report was brought in to the general, who, more diplomat than martinet, liked to handle such things personally. "I'm sure you're right," he said. "The men over there are as claimful as the ones over which manoeuvres for his corps to be held had been provided by eager farmers. Much of the land was not under cultivation, and the general desired hillocks, streams, rocky terrain, it was inaccessible to the curious.

"There's just this one hitch right," he said to his aide.

"Yes, sir. It seems this farm wife—in a moment of the heat—she reluctantly refused to let us use this wooded section." He indicated a district on the contour map. "She's a native of the country, you know, and this—fattening his palm seat a foot ten inches above the floor—'and she has the prettiest head of snow-white hair I've ever seen. Also, she has a Springfield with which she can smash a bethit sitting on a fence post as far as from here to the next building.'

The general measured the distance with his eyes. His eyebrows went up, and his lower lip popped out. "Maybe," he said, "she's about her," he said. "Then, 'I'll fly down and have a talk with her. Find out what her objections are, exactly. Did you know, either she seemed to be much of a cook?'

The aide looked puzzled. "No, sir. I didn't notice."

"If you can get a woman to making doughnuts or cookies for a batch of 'heroic boys'—you've made an army convert!" the general observed, chuckling. ***

There was a car waiting for him at the airport. The general, after an hour of reaching the farm, which consisted of rolling hills where a herd of whitefaced cattle were grazing, a thriving vegetable garden, a big red barn, and a screened porch on three sides, with a screened porch on three sides, with a

A cat and two dogs came to meet the general. The cat arched herself

aroused her, and the dogs showed an inclination to kiss his face. "What kind of guard duty is this?" he demanded gruffly, scratching his head behind their ears.

Not until he had seen the dog climb the screen while the cat climbed the screen and clung there. A small woman, wearing a blue and white apron, came out on the porch. "I don't want anything," she said in a blank-eyed way, drawn together in a faint smile. "Be on your way, before I give you. Be on your way, before I give you."

"I'm not doing anything. I simply want to talk to you."

"What kind of uniform you wear?"

"You another one of these army peeps?"

He inhaled deeply of the aroma coming from the kitchen. "Fresh bread? It's been years since I had a bite of new-baked bread."

"You think you can get around me by sweet-talking, you've got an idea, but I'm not in the mood. I don't eat all day, either," she ordered. She poured milk into a tall tumbler, and handed it to the general, then she placed a pat of butter on the plate, added two rolls and home-made bacon jelly. "There," she said, bringing her lips tightly together, "that's better than you'll get in any officers' mess."

Between them the general said, "I suppose you know I've come about using your grove during manoeuvres?"

"I gave my answer to that young fellow—the one with a mustache. I said 'No'."

"Why?"

"Because I don't believe in war."

"That's a fine crop of potatoes you have. You garden, too?" The general responded with a smile. "Did the plants come up out of their own accord?"

"I hope you know more about tactics than you do about vegetables," the woman snorted. "I planted them."

"So you have to plant them every season—they just don't grow of themselves?" she asked. "Have any trouble with bugs?"

"Ever see a potato patch without its bugs? Sure I have to fight bugs. Sometimes I have web worms to contend with, too."

"What's this?" the general said, even the Dutch government—which appointed him to the junior post—had not decided who would be the next tenant of the "Hilse Doorn."

There is truly regal luxury in every apartment, which leaves one gasping. Half a dozen good Mercedes-Benz limousines are at the disposal of the general in running order, to be used by no one knows. Labouchere says even the Dutch government—which

had not decided who would be the next tenant of the "Hilse Doorn."

Dorn Castle

Where The Kaiser Lived In Exile
(By Maurice Desjardins)

Dorn, a little city of 5,000 and is one of the best known in the world, for here stands the Kaiser's castle, where the late Kaiser chopped and beheaded wood in a state-roofed shed until he died here June 4, 1941.

Major Armand Labouchere, a nephew of French Huguenot descent, showed me through the palace grounds.

First we visited the famous woodshed, then the guest house, where the Duke of Windsor stayed in the crown prince's room. Across a moat on the right side of the castle stands a square manse where the emperor's body lies in a red velvet sarcophagus.

I was the first Allied war correspondent to visit the palace and probably the first newspaperman of all time for Dorn was no tourist place, for Dorn was no tourist place.

The castle has not been lived in since the Kaiser's death, but every one of scores of expensive clocks and furniture keep exact time. Labouchere, a retired Dorn policeman, ushered us into the reception hall where the furniture and Gobelin tapestries are relics of the time of Frederick the Great.

The Nazis took Dorn during their occupation of the Netherlands. Only a few officers visited here for the majority were afraid they'd be accused of being communists.

Labouchere, a retired Dorn policeman, ushered us into the reception hall where the furniture and Gobelin tapestries are relics of the time of Frederick the Great.

There are bigger-than-life-size pictures of the Kaiser hanging in every room in the palace.

In the rooms are objects worth millions of dollars, including bookshelves, a gem-studded suit of armor, chairs, Sevres vases and exquisite miniatures.

I also saw the emperor's den and the study, where he used to sit on writing letters.

There is truly regal luxury in every apartment, which leaves one gasping. Half a dozen good Mercedes-Benz limousines are at the disposal of the general in running order, to be used by no one knows.

Labouchere says even the Dutch government—which appointed him to the junior post—had not decided who would be the next tenant of the "Hilse Doorn."

Has Big Job

What Else Is Expected To Do
On Big Job

Electricity abhors a big boomer is called upon to perform the following tasks: Start the engines, change the propeller pitch, raise and lower the landing gear, and land the plane. He may have to manipulate the flaps and brakes, run the bombsights, release the bombs, turn the gunnery sights, compute the gunnery sights, and identify ground targets by radar waves, and provide light and heat for the crew.

FOREST FIRE LOSSES

The greatest loss occurring in mature trees, but not the ruination of young growth, and the charing of the forest floor, since much of the older timber still can be utilized.

THE QUAKER OATS COMPANY OF CANADA LIMITED

New Flying Boat

Planning To Build Largest One Ever
Produced In Britain

Brooklands Aeroplane Company has planned for the largest flying boat ever built in Britain. The six-engined aircraft will weigh 138 tons—more than six times as much as the R.A.F.'s Sunderland—and have a wing span of 200 feet. It would carry up to 160 passengers or 60,000 pounds of freight.

Top speed would be more than 300 miles an hour, and normal cruising speed 260 miles at 15,000 feet. A pressurized cabin would be provided for passenger comfort.

Pinocchio Frock

4811
1933

As soon as his real character was revealed, which was immediately after he came to power, he became the focal centre for the apprehensions of friend and foe.

He began to suppress, and ranted over the radio until his voice became the symbol of violence and fear. He is gone now, but it will be long before that the real enemy—Hitler—will be forgotten.

He was a simple, kindly, cheap rabbler-rouser, but the ideas he represented.

Hitler called himself führer. But he was in fact a tyrant, and a凶暴的 ruler in Germany which hoped to profit from what he offered.

He talked of Aryanism, of blood and soil, of race purity, lebensraum and similar Nazi concepts.

His single aim was power, and his single goal the elevation of the German people to the role of "master race".

It is this evil creed that has to be eliminated. There must be a purge of Germany. For more drastic treatment of that nation which three times in a century has attempted world domination is demanded than the mere receiving of capital punishment.

The bold and rubid that is now Germany must be cleansed for the last time.

Ottawa Citizen.

End Was Appropriate

History Has Been Written In Disintegration Of Germany

This is as inglorious an end as history could write—but an appropriate end for a Government that was born in a hell hole whose birth was witnessed by a man found guilty of treason, a Government which operated without ideals and had as its fundamental purpose to loot and enslave the other nations it had witnessed earlier to be distorted by another Goebbel.

History has been written this time too plainly to be changed.

Let the beginning of Nazism stand forever as a warning.

Let its obscene end be remembered as a lesson.

New York Times.

When doing interior repainting in these war days when conservation of light is important, it is well to remember that light reflects much more brightly than dark materials. Dark woodwork and dark trim will call for light-colored walls.

When painting exterior walls,

the lightest colors will be best.

Painting exterior walls.

Liberal Working Plan for Full Post-War Employment...

For Veterans—\$750,000,000 to get them started

in sound jobs and to help them in business for themselves as such of them choose.

Business—\$400,000,000 to finance the biggest expansion of business the country has ever known.

Family Allowances—\$250,000,000 a year to lessen the burdens of parenthood and to equalize the opportunities of young Canadians for success and happiness.

Export Credits—We're going to export what we're going to have jobs. Your Liberal Government has arranged to finance the way to success for our country's good customers later.

Industrial Development Fund—Your Liberal Government has set up a special fund to help enterprising Canadians develop new business.

Farm Leases—One man in every three in Canada now works on a farm. To help them get the equipment, your Liberal Government has arranged that they can buy it on easy terms. The need for better working and living conditions!

How Poor—The Liberal Government's policy is that when farmers and others are better off, so are all other Canadians. It has therefore taken action to keep prices under the prices of farm and fishery products.

Reduction of Taxes—Your Liberal Government believes in jobs first. To this end, taxes will come down to free people to work.

These are just some of many steps in the Liberal Government's Working Plan to ensure full employment after the war. In addition, it has stimulated tremendous private savings in Victory Bonds and War Savings Certificates, set up a Special Employment Institute, and set up a Special Department of Reconstruction, directed by experts in fact, its policies are directed to the same end—full and stable level of employment and income.

BUILD A NEW SOCIAL ORDER
VOTE LIBERAL

JOBS!

Jobs with bright futures for the young men and women coming out of the Armed Services with the best part of their lives before them! Jobs for all! Jobs with big prospects and good, reliable money that will keep its buying power! After all the hard work, sacrifice and self-discipline which has brought us through the war, the people of this country have earned a brighter future in a better, juster, grander Canada than we have ever known!

LOOK how much Canadians have accomplished, here on the home front, even without the energy and initiative of all the vigorous young people now in uniform, and their zest for daring! What is there Canada can't do with them back on the home team? Why, with their help, we Canadians are headed full speed for the greatest period in our history!

THE all-important question today is—the civilian staff-work and leadership which we call "government." The Liberals have a working plan. It's big and bold! Parts of it are outlined for your judgment in the left-hand column. It has been designed with the aid of the keenest minds in every phase of industry, agriculture, labour and learning. The plan will work. In fact, it is already bringing results. It will continue to do so! The Liberals can tell you this with confidence because they have had successful experience in operating nationwide plans.

VOTE for your Liberal candidate. Make sure the team which made this plan for full employment shall see it through—and win the peace!

Liberals' Farmers' Service

Late Blight of Potatoes

In 1847, ninety thousand Irish people died out for Canada. Two thousand died in the same year. Many others emigrated to the United States. In an 18-month period (1942-43) of potato blight, the losses amounted to nearly forty million dollars, and the relief was far from generous. Suffering in Ireland was unprecedented.

This unhappy state of affairs was brought about, however, through the carelessness of those in power. Late Blight is a disease of the potato. At that time the cause of the disease was unknown and while plant scientists around the world and experts in the field were hungry, serious losses also were suffered in England and western countries.

Today, we know how to control this disease. Serious damage has been common, but not general, for the last four years, and local infestations have been recorded in Saskatchewan and Alberta.

Therefore, all potato growers should be on the lookout and be prepared to employ measures for control. The experts have been provided with a supply of illustrated circulars in which the disease is clearly described and control methods outlined.

Control is comparatively simple and cheap. Ask the local election agent for a copy of the Farmers' Service Circular No. 8—Summarized from information provided by Dr. J. E. MacEachan, Department of Plant Pathology, Winnipeg.

Control of the disease will be the full use of trade training received by men and women while in the armed forces.

LOCAL NEWS ITEMS

Cpl. Amy and S. H. Hampton paid a visit to the Lake McGrath district Saturday. They report there has been much rain in the south country.

P. O. Rousche returned to the home freidle Saturday morning. He spent about three years overseas in many of the different theatres of war.

The Gleichen Branch of the Canadian Mobile Blood Donor Clinic of the Canadian Red Cross Society, wish to express their thanks and gratitude to everyone who has given and is giving blood in Gleichen. May 16th, Miss Burton, nurse-in-charge and Mrs. G. Miller, assistant, reported 63 bloods were taken. There were nine rejections.

Lewis James Curwell, a resident of Gleichen for the past two years died at Eventide Home Friday night. He was born in Ottawa, Ontario and came to Alberta 54 years ago where started farming at Penhold, Alta., and was very successful there. In 1928 he moved to Gleichen and was 81 years of age when he died. The remains were shipped to Penhold by G. W. Evans, where the funeral took place Tuesday afternoon.

L.A.W.M. Peggy Creedon, Myrtle Plantagenet, and Leona of Gleichen spent the weekend in town in the guest of Mrs. G. W. Evans.

It looks as if the end of the crop year—July 31st—will find us with another big wheat crop. Estimated to be not less than 500 million bushels, it will still be larger than for any pre-war year, in spite of every effort being made to move as much as possible into export position.

CARD OF THANKS

We wish to express our thanks to those who assisted us in any way during our recent bereavement.

Mr. and Mrs. John Clark.

Gleanings From The Capital

(By HELEN MARSH)

GOVERNMENT'S DEPARTMENTS

In the past few months I have told you something about many of our government departments and boards. Your editors ask for these stories because, before the government election, they wanted to know what we could expect in knowing "what" government does? So I go along to cover the last half dozen departments in this week and next so that come June 11th, you will have had the whole story.

Health and Resources is a department with five special branches: immigration; Indian affairs, surveys and engineering (under which come the Dominion observatories, maps and the International Boundary Commission); lands, parks, and forests (under which come administration of our national parks, and of the Northwest Territories and the Yukon); and science and industry (under which come the Bureau of Mines and of Geology, the National Museum of Canada).

National Defence needs no explanation. Divided into three branches, Navy, Army and Air Force, the Department of National Defence recruits over a million Canadian men and women into the armed services, has trained them and built up from them a first class fighting force.

National Minerals and Supply was set up to let contracts and award orders for all the war work produced in Canada for Canadian and Allied use. Canada is the only country of the United Nations which handles all war supplies through a single agency. Two branches—Production and Transportation—helps to convert the raw materials into war products.

Production branch, supplies helps to convert and expand peacetime industries, and has even established own and operate 28 Crown companies, including chemicals, explosives and shell-making, aircraft, ships, etc.

The central branch of M & S is concerned with regulating supplies of raw materials.

FINANCA needs vegetable oils, and the U.S.A. is willing to do a swap with us, sending us vegetable oils in return for flour. This provides the market Canadian farmers want for their surplus wheat, right?

Manitoba last year paid off at \$23.60 an acre compared with \$23.05 for wheat.

SERVICE CANDIDATES

COMING HOME

Men in the services overseas who have been nominated as candidates in the soon-to-be-held provincial and federal elections are being seen as fast as possible in their own campaign. They get the highest possible priority.

Announcing NEW LOWER RATES on Farm Property.

and other additional benefits—

100% INSURANCE. Under a "Portage" policy, your farm property may be insured to its full cash value.

CONVENIENT PREMIUM PAYMENTS may be arranged to fail due at times more suitable to farmers.

COMPLETE PROTECTION AT LOWEST RATES. Being a mutual company, rates include NO profits and are therefore lower.

PROMPT, LEGAL SETTLEMENTS. All claims are given early and without delay. Settlements are generally fair.

Ask your "Portage" Agent for full facts and figures.
